New Castle Metal Roofing

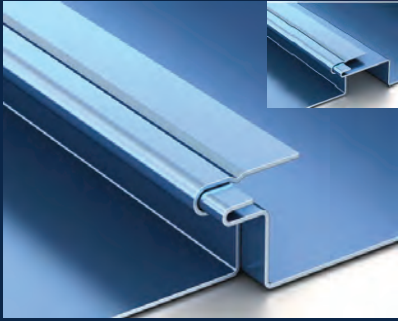

On-Site Delivery and Custom Fabrication Available!

We offer a full line of standing seam roofing systems with panel fabricated on-site or factory-formed. The systems are completed with all the trims and accessories you need from our fully computerized metal shop. Our metal shop is ES-1 certified allowing you to meet the most stringent code and specification requirement. Trained estimators are available for plan and satellite imaging take-offs for all edge metal and standing seam systems.

NC-FWQ1

1" Flush Wall and Soffit Panel

Versatility is the hallmark of this panel. With depth of 1" the FWQ-1 can be utilized as either a soffit panel or wall panel. Available with up to a 3" optional reveal. This panel is among the only soffit/wall panel to be approved for Weather-Tightness Warranty.

NC550S

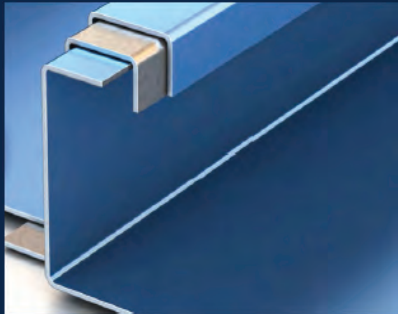

1.5" Snap-Lock System

The NC550S is a concealed fastened snap lock system with an integral locking panel. This means the panel is securely engaged along the entirety of the rib. Our most popular residential panel, can be installed quickly without sacrificing quality.

NC220MS

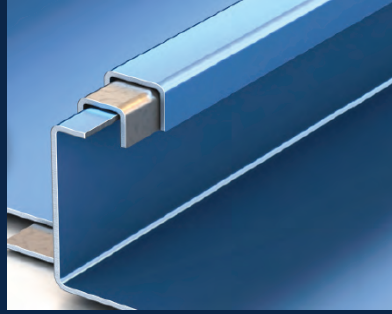

2.0" Mechanically Seamed

Slightly larger than the 150SS this panel is ideal for industrial, commercial, and larger residential projects. Suitable for installation over open framing, polyiso, or plywood. This panel is among our most versatile.

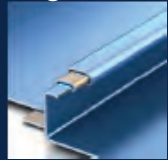

NC150SS

1.5" Mechanically Seamed

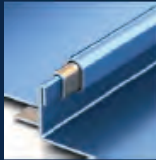

While a 1.5" high rib, this panel is strong enough to handle stringent building codes without sacrificing its architectural beauty. Ideal for light commercial, residential and historical projects.
